Tạo project

Khởi tạo project

Sau khi tạo

Add controller

Tạo homeController

The screenshot shows the Visual Studio code editor with the file `HomeController.cs` open. The code defines a `HomeController` class that inherits from `Controller`. It contains a single action method, `Index()`, which returns a `View()`. The code is as follows:

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.Mvc;

namespace ProjectWeek1.Controllers
{
    public class HomeController : Controller
    {
        // GET: Home
        public ActionResult Index()
        {
            return View();
        }
    }
}
```

Add View cho controller

\

Khi add view xong sẽ hiện ra view này

```
Index.cshtml
@{
    ViewBag.Title = "Index";
}

<h2>Index</h2>
```

Sau khi chạy thử project ban đầu

Thêm ảnh MVC.jpg

Chạy lên

Tiếp theo copy các thư mục vào ADMIN

— Application name

Chào mừng đến với trang Index đầu tiên!

Đây là trang mặc định của ứng dụng MVC mà bạn vừa tạo thành công.

Ảnh trên được tải từ thư mục **Images** trong project.

© 2025 - My ASP.NET Application

The screenshot shows the SB Admin v2.0 dashboard. On the left is a sidebar with navigation links: Dashboard, Charts, Tables, Forms, UI Elements, Multi-Level Dropdown, and Sample Pages. The main content area displays the "Chào mừng đến với trang Index đầu tiên!" message, the explanatory text about it being the default MVC page, and the MVC architecture diagram. Below the diagram is the note about the image being from the 'Images' folder.

Sau khi thay index.cshtml bằng

```
@{  
    Layout = "~/Views/Shared/_Layout.cshtml";  
    ViewBag.Title = "Dashboard";  
}  
  
@Html.Partial("DashboardContent")
```

Tạo TableController:

```

TableContent.cshtml Index.cshtml TableController.cs ✘ X DashboardContent.cshtml
ProjectWeek01 ProjectWeek01.Controllers.TableController Index()
ProjectWeek01
    using System;
    using System.Collections.Generic;
    using System.Linq;
    using System.Web;
    using System.Web.Mvc;

    namespace ProjectWeek01.Controllers
    {
        public class TableController : Controller
        {
            // GET: Table
            public ActionResult Index()
            {
                return View();
            }
        }
    }

```

Trong TableController tạo view index

```
Index.cshtml  X  TableController.cs  DashboardContent.cshtml  _Layout.cshtml  In
@{
    ViewBag.Title = "Index";
    Layout = "~/Views/Shared/_Layout.cshtml";
}

<h2>Index</h2>
```

Tạo Partial View cho phần nội dung Table:

Gắn TableContent vào Views/Table/Index.cshtml:

```
TableContent.cshtml  Index.cshtml  X  TableController.cs  DashboardContent.csht
@{
    ViewBag.Title = "Tables";
    Layout = "~/Views/Shared/_Layout.cshtml";
}

@Html.Partial("TableContent")
```

Sửa menu “Tables” trong _Layout.cshtml

```
<!-- /.nav-second-level -->
</li>
<li>
    <a href="@Url.Action("Index", "Table")">
        <i class="fa fa-table fa-fw"></i> Tables
    </a>
</li>
```

Kết quả khi chạy

The screenshot shows a web browser window with the URL <https://localhost:44329/Table>. The page is titled 'Tables' and contains a table with the following data:

Rendering engine	Browser	Platform(s)	Engine version	CSS grade
Trident	Internet Explorer 4.0	Win 95+	4	X
Trident	Internet Explorer 5.0	Win 95+	5	C
Trident	Internet Explorer 5.5	Win 95+	5.5	A
Trident	Internet Explorer 6	Win 98+	6	A
Trident	Internet Explorer 7	Win XP SP2+	7	A
Trident	AOL browser (AOL desktop)	Win XP	6	A
Gecko	Firefox 1.0	Win 98+ / OSX.2+	1.7	A
Gecko	Firefox 1.5	Win 98+ / OSX.2+	1.8	A
Gecko	Firefox 2.0	Win 98+ / OSX.2+	1.8	A
Gecko	Firefox 3.0	Win 2k+ / OSX.3+	1.9	A
Gecko	Camino 1.0	OSX.2+	1.8	A
Gecko	Camino 1.5	OSX.3+	1.8	A
